City of Cleveland Announces Small Cell Facilities Design Guidelines

CLEVELAND – The [City of Cleveland](http://www.cityofcleveland.org) today released the Small Cell Facilities Design Guidelines, a set of regulations for small cell facilities, support structures, and infrastructure elements. The guidelines are intended to assist service providers in the deployment of 5G technology and preserve public safety while integrating emerging technology with new and existing infrastructure.

[Download the new guidelines](#), [download the application](#) and [view the City Planning Commission Presentation](#).

As these types of facilities are installed throughout civic areas, increased care is necessary to maintain public safety and support the general health and welfare of citizens. The new guidelines will address, maintain, guide and inform service providers, construction applicants and citizens.

These guidelines apply to all small cell facilities, support structures, equipment and infrastructure elements and systems deployed in the City of Cleveland both within the City of Cleveland controlled right-of-way and for any facility within a private right-of-way. They are intended to be used in conjunction with all City of Cleveland Codified Ordinances and departmental requirements. Cleveland City Planning Commission passed the guidelines on Friday, Oct. 19, 2018.

About the City of Cleveland

The City of Cleveland is committed to improving the quality of life its residents by strengthening neighborhoods, delivering superior services, embracing diversity and making Cleveland a desirable, safe city in which to live, work and play. For more
